

SENIOR REGULATORY TOXICOLOGIST & REGULATORY TOXICOLOGIST

Our client is a leading research organisation with an established history in offering high quality service and contribute in helping companies discover a solution to a certain medical need. For a quarter century they have offered consulting services to the Chemical/Agrochemical industry and now are the leading providers in training people within REACH. Therefore, you will be working for the leading contract research organisation in the Agrochemical/Chemical industry.

The Opportunity

You will be given the opportunity to develop and broaden your existing toxicology experience into Agrochemicals and Biocides. For this area you will receive development and training thus offering new and exciting challenge to develop your skills.

RESPONSIBILITIES

- Advise our clients on the data and testing needed to assess the safety of agro-chemicals and biocides to human health.
- Human Health Risk Assessments.
- Responsible for planning, monitoring and summarizing toxicological and animal metabolism studies relevant for assessing the safety for operators, workers and bystanders.
- Preparation of safety assessments and expert reports for regulatory submissions.

QUALIFICATIONS

- We are looking for a professional with a scientific degree (PhD, or MSc), with advanced training in toxicology. A degree in Toxicology is preferential
- Working previously in a position as a Regulatory Toxicologist.
- Experience in Regulatory toxicology. BONUS TO HAVE THIS WITHIN the Agricultural or chemical industries, or in a CRO.
