

The Basics of REACH Regulation

Learn the basics of one of Europe's most complex pieces of legislation

Since its introduction, there have been a number of amendments to the Regulation, the most recent consolidated version of the Regulation stands at over 500 pages, which itself is supported by thousands of pages of guidance and various implementing Regulations. REACH remains one of the longest and most complex legislative instruments implemented in the history of the EU, requiring a combination of legal, scientific and technical processes and expertise to successfully navigate.

Key benefits of taking this eLearning course

Informative, convenient & easy to use

- Hours of valuable training filled with up-to-date information on REACH – helping you master the basics of the legislation.
- The course is easy to pick up where you left off – enabling you to study at your own pace.
- Runs on PC, Mac, tablet and smartphone – allowing you to study at work, from home or on the go, fitting your training conveniently around your busy schedule.

Appeals to a wide range of learning styles

- The course combines professionally designed pages of content, audio explanations and videos, providing a self-paced course that supports trainees' different learning styles and walks you through the key concepts.
- Extensive glossary of terms – helping you decipher key terminology.
- Five course note handouts – for further reading and to help you revise the material on and offline.

Measurable outcomes

- Self-assessment quiz questions – helping you measure whether you've met the learning objectives for each section of the course, giving instant feedback on your progress.

Affordable learning

- Low per-trainee prices and attractive group rates – ensuring you maximise returns on your training budget. Initial single place cost: **€350 (£310/\$435)**

Learning outcomes

This informative eLearning course will explain:

- The history of REACH;
- Substances of Very High Concern (SVHC);
- The scope of the legislation;
- The different regulators involved; and
- Different enforcement methods.

You will encounter these topics, and many more, across four separate modules, encountering different styles of interactions to help embed the lessons you will learn. Your knowledge will be tested at the end of module assessments where you can really measure your powers of retention on what you have learned.

Who is this course for?

This eLearning course is useful to any individuals or organisations working with the REACH Regulation. This includes:

- Business managers
- Regulatory staff
- New recruits to companies needing a quick-start to understanding REACH
- R&D chemists
- Anyone involved in REACH regulations
- Anyone involved in classification and labelling in accordance with EU CLP/GHS
- Health and safety professionals

Our trainees

The Basics of REACH Regulation is joining our growing portfolio of eLearning courses, which have already helped 1,400 professionals develop their knowledge. Trainees on our popular courses such as Chemistry for the Non-Chemist, The Beginner's Guide to Toxicology and The Practical Guide to Ecotoxicology and the Environment have included professionals from companies such as:

Modules

MODULE 1

Introduction and background to REACH

- Understand the objectives, scope and basic principles of REACH.
- Understand the aim of its four main protocols.
- Put REACH into the context of previous and current associated legislation.

MODULE 2

Key terms and concepts

- Understand the key concepts of REACH.
- Broadly identify which requirements apply to your product.
- Recognise how the different protocols of REACH interact with each other.

MODULE 3

Key players and processes

- Explain the role and responsibilities of regulators, stakeholders and industry.
- Describe various processes involved in the Regulation and ways in which stakeholders can influence them.
- Identify what options companies have when interacting with regulators.

MODULE 4

Enforcement

- Understand what the roles of different authorities are and who enforces REACH.
- Recognise what might trigger an inspection.
- Summarize the penalties for non-compliance.

€350
